

## **QUUS IS A COMPLEMENTARY FEED MIXTURE, BEING THE WORLD'S FIRST IMPLEMENTATION OF OAT BETA-GLUCAN ISOLATE USING THE PROPRIETARY OATIN TECHNOLOGY.**

This provides the basis for our preparation, a specially prepared soluble fibre - oat beta-glucan isolate with 1.3 - 1.4 bonds and high molecular weight, awarded in the 20th edition of the Polish Product of the Future competition. This leading ingredient is supported by probiotics, herbs and linseed oil, which provide holistic support for our preparation.

The main goal of QUUS is to provide breeders with natural and effective protection for their horses. Effectiveness, convenient administration and a palatable form are the distinguishing features of QUUS, which cares for the safety of the horse's digestive system.

### **RECOMMENDED USE**

Thanks to the high molecular weight of its main active ingredient, QUUS creates an anti-inflammatory protective layer that coats the stomach lining. In horses, stomach acid is produced continuously. An inadequate diet and stressful conditions make the animal's stomach susceptible to the development of wounds and ulcers.

The oat beta-glucan isolate, phytoncides and probiotics contained in QUUS not only protect the stomach wall from excess gastric juices, but also ensure rapid regeneration of the mucous membrane and intestines.

### **MANUFACTURER'S RECOMENDATIONS:**

- support for the treatment of stomach and duodenal ulcers,
- prevention of stomach and duodenal ulcers,
- support for the treatment of intestinal inflammation,
- reduction of the risk of colic.

## QUUS IN PRACTICE

The effectiveness of the preparation has been confirmed both in clinical trials and in the daily practice of users. Under clinical trial conditions, QUUS achieved 75% effectiveness in reducing the symptoms of EGUS. According to data from horse owners, the effectiveness of QUUS exceeds 90%. 80% of customers decide to continue using it as part of regular or seasonal prevention, which proves the high level of trust and visible results of the therapy.

## PRODUCT INGREDIENTS

dried apple, wheat bran, linseed, vegetable oil (linseed), refined oat bran (oat beta-glucan isolate 1.3-1.4 – 300 or 200 grams), processed herbs (marshmallow, sea buckthorn, milk thistle, chamomile, lemon balm), dried fruit, calcium carbonate, inactivated yeast – *Saccharomyces cerevisiae*.

## INSTRUCTIONS FOR USE

QUUS has been prepared in an accessible form – as tasty granules with an appetising aroma.

The product is very eagerly consumed by horses. QUUS can be added to meals, mash or served separately.

## RECOMMENDATIONS

Preventive treatment: 50 g of the product twice a day

Support therapy for stomach ulcers: 75 g of the product twice a day

Individual portioning of QUUS, based on observation of the horse by the caretaker, means that a 4.5 kg package can meet its needs for up to 3 months

## PACKAGING AND STORAGE

The product is available in 3 kg and 4.5 kg net packages.

Store in a dry and cool place.

Best before date as indicated on the packaging.
